

DIEGO J. PEÑA C.

Medellín, Colombia • Diegojosepc3@hotmail.com • +57 314 8793518 • www.diegojpc.com

PROFESSIONAL SUMMARY

- Acoustic Engineer and Data Scientist with experience in data analysis, machine learning solutions development, and full-stack applications.
- Recent experience implementing RAG systems and AI voice assistants for startups.
- Passionate about machine learning, applied statistics, and AI-driven process optimization.

EDUCATION

Cloud Architecture – Advanced Innovator Level <i>Talento Tech (MinTIC) - Col</i>	<i>Abril 2025 - Present</i>
IBM AI Engineering Professional Certificate <i>Coursera</i>	<i>Marzo 2025 – Present</i>
Software Development Specialization <i>EAFIT University, Medellín - Col</i>	<i>June 2025</i>
Machine Learning Basics <i>AWS Training and Certification</i>	<i>April 2025</i>
Data Science and Artificial Intelligence / Data Analyst <i>Platzi</i>	<i>June 2024</i>
Data Analyst <i>Platzi</i>	<i>July 2023</i>
Diploma in Data Analysis and Machine Learning in Python <i>University of Antioquia, Medellín – Col</i>	<i>October 2022</i>
Sound Engineer <i>University of San Buenaventura, Medellín – Col</i>	<i>June 2022</i>

PROFESSIONAL EXPERIENCE

Virtualsoft – Data Scientist	<i>August 2025 – May 2026</i>
• Implement a real-time hybrid recommendation engine capable of processing user interactions in milliseconds to personalize gaming offers. • Design a Transformer-based architecture and a Two-Tower model to generate latent representations of sequential user behavior. • Deploy high-availability models using NVIDIA Triton Inference Server, achieving efficient memory management and low latency in production. • Integrate Qdrant as a vector search engine and orchestrate ML microservices (Stream Processor, API Gateway) on Google Cloud Platform (GCP).	
Brain AIX (startup) – AI Engineer / Data Scientist	<i>February 2025 – May 2025</i>
• Develop and implement Retrieval-Augmented Generation (RAG) systems using LangChain to improve information extraction and synthesis. • Design and automate a conversational AI voice assistant integrating Vapi to optimize customer interactions. • Apply Web Scraping techniques for information extraction to feed OpenAI LLM models.	
CONHINTEC – New Technologies Analyst	<i>August 2023 – July 2024</i>
• Create and deploy over 100 dashboards in Power BI, improving data analysis efficiency and table relationships by 30%. • Develop Python applications to automate statistical processes in R, reducing company operational times.	

- Implement, develop, and maintain IoT systems to optimize the accuracy of field data collection.

SKILLS

- **Programming Languages:** Python (FastAPI), R, SQL, MATLAB, JavaScript, React, C++.
- **Machine Learning & AI:** Scikit-learn, TensorFlow, Pytorch, Keras, LangChain, Sistemas RAG, Modelado predictivo, NLP.
- **Cloud, DevOps & MLOps:** AWS (EKS, CloudFormation), GCP, Docker, Kubernetes, Terraform (IaC), Azure DevOps, Arquitecturas Serverless.
- **Datos & Bases de Datos:** Qdrant (Vector Data Base), MySQL, PostgreSQL, Pandas, NumPy, Power BI.

IDIOMAS

- **Spanish:** Native.
- **English:** Intermediate (B1)
